

安装openjdk-7

The master branch of Android in the Android Open Source Project (AOSP) requires Java 7. On Ubuntu, use OpenJDK.

Java 7: For the latest version of Android

进入/usr/lib/, 创建jvm目录

```
$ sudo apt-get update $ sudo apt-get install openjdk-7-jdk
```

Optionally, update the default Java version by running:

```
$ sudo update-alternatives --config java
```

```
$ sudo update-alternatives --config javac
```

openjdk1.7无法和以前jdk1.6兼容, 所以在/etc/profile里配置openjdk环境变量

注意: 若代码中已添加"lunch项目后修改jdk环境变量"功能后, 以下不用配置

```
export JAVA_HOME=/usr/lib/jvm/java-7-openjdk-amd64
```

```
export JRE_HOME=/usr/lib/jvm/java-7-openjdk-amd64/jre
```

```
export PATH=$JAVA_HOME/bin:$JAVA_HOME/jre/bin:$PATH
```

```
export CLASSPATH=$CLASSPATH:.$JAVA_HOME/lib:$JAVA_HOME/jre/lib
```

安装openjdk-8

How to Install OpenJDK 8 in Ubuntu 14.04 & 12.04 LTS <http://ubuntuhandbook.org/index.php/2015/01/install-openjdk-8-ubuntu-14-04-12-04-lts/>
[<http://ubuntuhandbook.org/index.php/2015/01/install-openjdk-8-ubuntu-14-04-12-04-lts/>]

OpenJDK Java 8 has been made into official Ubuntu repositories for 14.10 Utopic and higher. For Ubuntu 14.04, Ubuntu 12.04, and Linux Mint 17 users here's how to install it from PPA.

OpenJDK 8 was released in March 2014. It's available in Ubuntu Software Center for Ubuntu 14.10 and Ubuntu 15.04. Someone has reported in launchpad asking for packaging openjdk-8 in Ubuntu 14.04, but no luck so far.

As a workaround, you can install OpenJDK 8 from a PPA repository:

1.

```
sudo add-apt-repository ppa:openjdk-r/ppa
```

2.

```
sudo apt-get update  
sudo apt-get install openjdk-8-jdk
```

3.

```
sudo update-alternatives --config java
```

Type in a number to select a Java version.

set default java version

And set default Java Compiler by running:

```
sudo update-alternatives --config javac
```

4. Finally check out current Java version by running:

```
java -version  
  
It outputs something like this:  
  
openjdk version "1.8.0_01-internal"  
OpenJDK Runtime Environment (build 1.8.0_01-internal-b04)  
OpenJDK 64-Bit Server VM (build 25.40-b08, mixed mode)
```
